

OSA # 4869-65

10 December 1965

Subject: RCD Chemicals, Contract LP-2264

Dear Chuck, [redacted]

STATINTL

Reference [redacted] letter AKP-I-4895 on this same subject. We recommend that you request [redacted] to provide an initial quantity of 600 RCD chemical packages. This limited quantity is based on the chemicals unknown shelf life at the PSO and Beale plus the possibility of a change to one or more of the solutions as a result of flight test experience. Obviously then, we do not believe we should request chemicals for later years at this time. Finally, Nat should advise the PSO as soon as possible of the exact size of the chemical package and its temperature storage limitations.

STATINTL

Regards,

STATINTL
